Memory loss that disrupts everyday life is not a normal part of aging! This program will explore the difference between normal age-related memory changes and abnormal changes that are associated with Alzheimer's disease or related dementia disorders; the 10 warning signs will be described. The importance of a thorough medical examination when symptoms first arise, current treatment options and research trends will be addressed.

Presented by

Amy E. Matthews

Associate Director, Late-Stage Dementia Care,
Education and Outreach
